This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. EXPLANATION.

THIS catalogue includes all books on the accessions catalogue the first day of September, 1883, which can be taken home without obtaining special permission from the librarian. It has been prepared by Miss SARAH F. EARLE, the head of the Catalogue department, from the rules of Mr. Cutter, of the Boston Athenæum, as a basis.

Books are entered first under the author, if known, or, if not, under the first word of the title, not an article.

Stories, novels, plays, essays, *etc.*, are entered, also, under the first word of the title not an article, excepting where, as in a few instances, the title has been transposed; as, Arthur O'Leary, Adventures of;—Henry Esmond, History of;—Dombey and son, Dealings with the firm of;—Mary Powell, Maiden and married life of.

Histories and travels, the arts, philosophy, and science must be looked for under their specific subjects; also books relating to the language and literature of the different countries. For instance, under the heading **France** will be found sub-headings, *Description; History; Language; Literature;* and many sub-headings will be found further divided, to obviate the necessity of looking through long lists for special books. Below will be found enumerated a few of the more important subject headings, which have many entries under them, while many more will be found in their proper places in the alphabet.

The English language and literature not being the language or literature of a special country, books about these subjects will be found under the heads, Eng. ballads, Eng. drama, Eng. language, Eng. literature, Eng. poetry, *etc.* Many works relating to England relate to Great Britain, and must be looked for there; noticeably in *Biography*, *History*, *Law*, and *Politics;* while *Art*, *Description*, *Ecclesiastical history*, *etc.*, are under England. The sub-headings are distinguished by italics.

In making up the list for each author, not only his separate books have been enumerated, but every important work found in any collection which the library contains, the abbreviated title and number of the book containing the work being given. For instance, among Dr. Holmes's books, will be found his lecture on The medical profession in Massachusetts, published by the Massachusetts Historical Society, in

a volume of lectures. Following the author's works, will be found all the works or papers written about him which the library contains.

People must be careful to consult the copious references. For instance, under **Art** there is a reference to Art education and to Arts, Fine; and under the latter head, is a long list of references to kindred subjects under which there are many entries.

It is thought that the abbreviations need no explanation, as, though freely used, they are of common words, and serve only to admit of a longer title.

A list of corrections has been prepared, where will be found entries accidentally omitted or misplaced.

SAMUEL S. GREEN,
Librarian.
